Information Technology Oversight and Reform (ITOR) funding provides the Government with a resource base controlled by the Director of the Office of Management and Budget (OMB) to support activities and tools that enhance the efficiency, effectiveness, and security of Federal investments in information technology (IT). ITOR supports Government-wide efforts to modernize out-of-date and inefficient IT, secure Federal IT systems and the agency data within, increase transparency in IT spending, and improve the governance of IT projects and services.

Information Technology Oversight and Analysis.—Under the direction of the Federal Chief Information Officer (CIO), the Office of the Federal CIO (OFCIO) will continue engaging with agency CIOs to refine the guidance and tools supporting effective management of the large investment by Federal agencies in information technology. Additionally, ITOR funds will support policy analysis and development efforts to support innovative approaches to IT management, leveraging modern solutions to IT problems faced by all organizations, through reliance on cloud-based and shared solutions where appropriate. OMB will continue to ensure effective implementation by agencies of the Federal Information Technology Acquisition Reform Act (FITARA), as directed in OMB guidance.

Cybersecurity.—ITOR funding for cybersecurity will continue to enable OMB to expand its data-driven, risk-based oversight of agency and government-wide cybersecurity programs. It will ensure OMB continues the issuance and implementation of Federal policies consistent with emerging technologies and evolving cyber threats. OFCIO will continue to develop and enhance strategies to protect Federal information assets, acting in cooperation with the Office of the National Cyber Director, National Security Council staff, the Department of Homeland Security, the National Institute for Standards and Technology, the Congress, and Federal agency Chief Information Officers and Chief Information Security Officers.

United States Digital Service (USDS).—USDS is an organization of civil servants working across multiple agencies, bringing the best practices from various disciplines—engineering, product, design, procurement, data science, operations, talent, and communications—to enhance and sustain information technology (IT). In FY 2021, USDS received \$200 million in the American Rescue Plan (ARP) to carry out its mission of delivering better services to the public by rapidly responding to technology emergencies, solving complex challenges, and partnering with agencies to modernize legacy systems for long-term stability. USDS works on high-impact, customer-centric projects to implement the best practices in human-centered technology design that ensure a seamless, secure, and streamlined customer experience, improving access to services the public needs.

The Spectrum Relocation Fund (SRF), created by the Commercial Spectrum Enhancement Act of 2004, as amended by the Middle Class Tax Relief and Job Creation Act of 2012, reimburses Federal agencies that must relocate or share wireless communications systems in Federal spectrum that has been or will be reallocated for commercial use. Auction receipts associated with the reallocated spectrum are deposited into the SRF to pay eligible pre- and post-auction costs that help efficiently and effectively transition Federal agencies off of the reallocated spectrum or facilitate the sharing of Federal systems with non-Federal systems. The Office of Management and Budget (OMB) administers the SRF in consultation with the National Telecommunications and Information Administration (NTIA) of the Department of Commerce.

In 2015, a portion of receipts associated with the Advanced Wireless Services 3 (AWS-3) auction, which reallocates Federal and other spectrum for flexible commercial use, were deposited into the SRF. Funds from the AWS-3 auction are being transferred to agencies with approved transition plans to reimburse them for the costs associated with clearing or sharing the auctioned bands. Transfers were made every year between 2015 and 2023 and will continue in future years. Remaining AWS-3 funds in the SRF not needed to complete or implement current or future relocation or sharing arrangements will revert to the Treasury during 2023 for the sole purpose of deficit reduction.

In 2021, receipts associated with the Citizens Broadband Radio Service auction were deposited into the SRF, and funds are being transferred to agencies with approved transition plans to reim-

burse them for the costs associated with sharing the auctioned spectrum. Transfers were made in 2021, 2022, and 2023 and will continue in future years.

In 2022, receipts associated with the auction of 3450–3550 megahertz were deposited into the SRF, and funds are being transferred to agencies with approved transition plans to reimburse them for the costs associated with clearing or sharing the band. Transfers were made in 2022 and 2023 and will continue in future years. Most funds in the SRF must be returned to the Treasury eight years after they are deposited.

The Spectrum Pipeline Act of 2015, part of the Bipartisan Budget Act of 2015, authorized the transfer to agencies of up to \$500 million of SRF balances, and a portion of future deposits into the SRF, to fund advance planning and research projects that are expected to facilitate future spectrum auctions. OMB, NTIA, and the Federal Communications Commission have approved projects totaling \$400 million through the end of 2022.
